SUMMARY

Full-stack developer with a focus on backend, integrations and security. Final-year Systems Engineering student at the University of Pamplona, Colombia, working since August 2026 on production web applications for two Colombian companies (Node.js, Laravel, React, MySQL, PostgreSQL). Oracle Cloud Infrastructure Certified Architect Associate; English B2. Available from January 2027 for an internship or employment.

EXPERIENCE

Full-Stack Developer (Independent Contractor)

Aug 2026 - Present

Web projects for Distribuciones Rosimar S.A.S. and Lograr S.A.S. | Remote

- Developed and deployed talento.rosimar.com, an HR and recruiting PWA (React, JWT API, MariaDB) with a browser-based OCR resume parser that extracted 165 of 165 fields on 10 digital PDFs and reaches 89.8% on 40 test scans.
- Migrated the controlvehicular.rosimar.com backend (fleet fuel reconciliation against DIAN e-invoices) from Python/Flask to Node.js/Express; added 48 tests and fixed two security flaws (open redirect and CSRF).
- Hardened the rosimar.com store (Next.js, Laravel, PostgreSQL, Mayasis ERP, ePayco) with order ownership and amount checks, N+1 query fixes, and GitHub Actions CI with Playwright end-to-end tests.
- Integrated the Wompi payment gateway with signed event verification and added signed private video streaming for the Lograr course platform (Next.js 16, Laravel 12, MariaDB).

PROJECTS

NotebookLM Watermark Remover | Python, OpenCV

2025 - 2026

- Open-source command-line tool that cleans PDF, PPTX and image files with inpainting; 80 GitHub stars, 24 forks and contributions from 4 outside developers.

Early Warning System (SATIS) | FastAPI, PostgreSQL, SQLAlchemy, Alembic, React, TypeScript

2026

- Social impact project for the University of Pamplona that flags students at risk of dropping out. Implemented the backend JWT auth with refresh tokens, role permissions and Alembic migrations.

cUPido, social app for university students | React, TypeScript, Django REST Framework, PostgreSQL, Redis, MinIO

2025 - 2026

- Team project. Top frontend contributor (115 of 351 commits): reorganized the code by feature and created photo uploads with MinIO storage, compression and content moderation.

CircuitBreve, logic circuit simulator | React, TypeScript, Vite, Tailwind CSS

2026

- Browser-based logic circuit simulator with its own compiler and schematic layout, and no graph libraries. Truth tables up to 1,024 rows and export to SVG, PNG and PDF; 9 of 14 commits are mine.

EDUCATION

B.S. in Systems Engineering

2021 - 2027 (expected)

University of Pamplona (Universidad de Pamplona), Colombia | Ninth semester, final term of coursework

SKILLS

Programming: TypeScript, JavaScript, Python, PHP, Java, SQL

Backend: Node.js (Express), Laravel, Django REST Framework, FastAPI, REST APIs, JWT

Frontend: React, Next.js, Vite, Tailwind CSS, HTML, CSS

Databases: PostgreSQL, MySQL, MariaDB, Redis, SQLite

Cloud and DevOps: AWS (S3, Glue, Athena, Step Functions), OCI, Docker, GitHub Actions, Git, Linux, Hostinger

Testing and process: node:test, PHPUnit, Vitest, Playwright, Scrum

CERTIFICATIONS

Oracle Cloud Infrastructure Certified Architect Associate | Oracle | Oct 2026 | ID 103555769OCI26CAA

DevOps on AWS and Project Management | Amazon Web Services via Coursera | Jun 2025 | coursera.org/verify/IHHJU6O3TN4A

EF SET English Certificate: 59/100 (B2) | EF Education First | Jun 2025 | cert.efset.org/YsH6yp

LANGUAGES

Spanish: native | **English:** B2 (EF SET 59/100) | **Japanese:** basic
